*ATS Project Success
Clinton Township, MI*

Dear ATS,

This is the second year for my son, Jake, to use ATS in his studies. He loves the friendly and easy setup to log on and complete each tutorial. Jake has raised and maintained his scores in math to an "A" level or 5th grade math level. Not bad being in 3rd grade. Jake loves to be on the computer and loves the challenges set forth by ATS. My oldest daughter, in kindergarten, sits right beside him and tries to answer the problems with him. Jake is actually teaching her some simple math solutions and rules. Jake finds math simpler and wants to try the next level just to see if he can complete it. I mentioned that this is our second year, and Jake's instructor, Miss Sarah was very helpful, fun and caring about Jake's progress, as his instructor was last year. The updates on Jake's progress were very informative and simple to understand. I would recommend ATS to any parent at the elementary grade levels and if ATS could expand their tutoring skills to the secondary level, I would highly recommend it. I have been teaching high school for ten years and this program would improve test scores, graduation rates, and student confidence across the board.

Sincerely,

Todd
