

December 16, 2008

Dear ATS Project Success,

Once again, we have had another fantastic year with your tutoring program! This year instead of Math, we decided on Reading, and both of my daughters excelled beyond expectations! They are both two grade levels ahead in both their Reading and Math skills! I could not believe their progress in such a short time. I will recommend you to all of my family and the parents of all school- age children that I know. I look forward to working with Ms. Claudia Vettese again next year! This is our second year with her and she is wonderful! She is always ready and available with any help with all of my many questions. I do so appreciate her!

Thank you, once again for another great year!

Sincerely,
